

Fall 2019 Reclassification of English Learners

Disaggregated by School Site

Reflecting the CDE Dataquest’s rules for computing reclassification rate, the following report defines annual reclassification rate as follows:

The number of ELs reclassified fluent-English-proficient (RFEP) between prior fall census day and current fall census day divided by English Learner Count from prior fall. The source of the numerator, the prior fall’s count of English Learners, is CALPADS 1.2¹ and the source of the numerator, the count of ELs reclassified since the prior fall, is CALPADS 2.12².

More information regarding the reclassification process is available on the [Language Assessment and Development Department \(LADD\) website](#). Please note that during the transition to a new English assessment test in 2017, districts were provided a retest opportunity to reclassify students which contributed to the higher rate that year.

Table 1. English learner and reclassified English learner counts and percentages by school site.

	Fall 2017			Fall 2018			Fall 2019		
	EL #	RFEP #	RFEP %	EL #	RFEP #	RFEP %	EL #	RFEP #	RFEP %
Altadena ES	67	19	28.36%	45	1	2.22%	41	13	31.71%
Blair High	264	17	6.44%	272	1	0.37%	246	9	3.66%
Charles Eliot MS	57	8	14.04%	83	31	37.35%	72	14	19.44%
